Global growth stuck in low gear, yet all is not doom and gloom

Advanced economies: A weak but continuing recovery

- **US:** Growth is levelling off, but is still underpinned by solid fundamentals
- **Eurozone:** Positive but sluggish growth. Recovery varies from one country to another.

Recession or lower growth in large EM poses higher risks for other countries

- In the bulk of large EM, structural weaknesses are constraining growth (Russia, Brazil, China...).
- This situation affects other EM (Lat.Am, some African and Middle Eastern countries)...
- ...through various channels (trade, commodity prices, investment & transfers).

MOODY'S

- Coface is rated 'AA-' by Fitch Ratings and 'A2' by Moody's, both with a stable outlook
- The positive assessments by the two agencies is based on 3 key drivers:
 1. Coface's strong competitive position in the global credit insurance market
 2. Robust Group solvency
 3. Proactive management of Coface's risks, based on efficient procedures and tools
- Both rating agencies view Natixis' ownership of Coface as neutral to Coface's ratings which are thus calculated **standalone**

Fitch considers the Coface group to be strongly capitalised (...) [and] Coface's risk profile to be adequate despite the close correlation of its activities with the macroeconomic environment.
